I want to say NO on the HR4026 bill I oppose it very much. that bill is wanting to cancel the xm sat weather and traffic channels My husband and I are truck drivers and we use those channels and when the winter comes again they are great for finding out where the ice is and where the roads are closed. I pay for xm every month by choice and it is the best thing that has ever happened. So I would appreciate it if you would leave all of our channels alone. if you try to get information from an fm or am station you do not get it when you want it you have to get it when they give it to you. I want the freedom to choose to listen to them when I want Thank you
